

**The Family Module** Parents of LAUSD students can now become more involved in their children's education with the ISIS Family Module. Using a computer connected to the Internet, parents can log in at any time to monitor their child's performance in school.

**Currently, parents can...**

- View child's attendance
- View child's grades (progress reports)
- Teachers who use Gradebook within LAUSDMAX can also choose to allow parents to view assignments and grades for each assignment.
- View module headings in nine different languages (English, Spanish, Vietnamese, Tagalog, Russian, Farsi, Armenian, Chinese, and Korean). All data, however, will be in English, only.

**In the future, parents will be able to...**

- View children from multiple schools in one place (as long as Family Module is enabled in the schools)
- View child's course requests and schedule
- View child's graduation requirements and discipline record

Monitoring allows parents to...

- Talk with their child about attendance or grades issues
  - Praise efforts and accomplishments
  - Discuss areas of improvement
- Communicate concerns early with teachers or counselors
- Actively participate in intervention strategies
